As far as our HPE2-W07 practice test is concerned, the PDF version brings you much convenience with regard to the following two aspects, Udemy courses give you a first insight but although **Certification HPE2-W07 Exam** it covers all the sections it doesn't go too much in depth explaining all the concepts.

Our website always checks the update of HPE2-W07 test questions to ensure the accuracy of our study materials and keep the most up-to-dated exam requirements.

#### **NEW QUESTION: 1**

##### **HOTSPOT**

A company has a multidimensional cube that is used for analyzing sales data. You add a new measure named Transaction - Total Including Tax and include the Supplier, Payment Method, and Transaction Type dimensions in the data model. The Transaction - Total Including Tax measure uses the existing Customer and Date dimensions.

When users have queried the new measure in the past, they saw results as shown in the existing query output exhibit. (Click the Exhibit button.)

The overall total is incorrectly displayed on every row. In addition, the results are no longer formatted correctly. The query result should appear as shown in the desired query output exhibit. (Click the Exhibit button.)

You need to ensure the table is displayed correctly.  
What should you do? Use drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Enter a custom MeasureExpression property on the measure. Calculated measures use MDX expressions to supply their values, instead of binding to columns in a data source. The Expression property contains the MDX expression used to supply the values for a Measure only if the Measure is a calculated measure. Otherwise, this property contains an empty string ("").

### **NEW QUESTION: 2**

Your organization has a Microsoft Office 365 subscription. When the users attempt to access the Power BI Service, they receive the error message shown in the exhibit. (Click the Exhibit button.)

You need to ensure that all the users can access the Power BI service.

What should you do first?

- A. From the Power BI Admin portal, modify the Tenant settings.
- B. From Microsoft Azure PowerShell, run the Set-MsolCompanySettingscmdlet.
- C. From the Microsoft Azure Active Directory admin center, assign a Power BI (free) license to each user.
- D. From the properties of each dashboard, modify the Share dashboard settings.

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

You need to run the following cmdlet: Set-MsolCompanySettings -AllowAdHocSubscriptions \$true

### **NEW QUESTION: 3**

What is provided by the Stealthwatch component of the Cisco Cyber Threat Defense solution?

- A. dynamic threat control for web traffic
- B. malware control
- C. real-time threat management to stop DDoS attacks to the core and access networks
- D. real-time awareness of users, devices and traffic on the

network

**Answer: C**

Explanation:

Cisco Stealthwatch is a comprehensive, network telemetry-based, security monitoring and analytics solution that streamlines incident response through behavioral analysis; detecting denial of service attacks, anomalous behaviour, malicious activity and insider threats. Based on a scalable enterprise architecture, Stealthwatch provides near real-time situational awareness of all users and devices on the network.

Reference:

Note: Although answer A seems to be correct but in fact, Stealthwatch does not provide real-time protection for DDoS attack. It just helps detect DDoS attack only.

Stealthwatch aggregates observed network activity and performs behavioral and policy driven analytics against what it sees in order to surface problematic activities. While we don't position our self as a DDOS solution, we're going to leverage our analytical capabilities to identify a DDoS attack against an internal host using the WebUI.

#### **NEW QUESTION: 4**

Which two statements about MPLS LDP Session Protection are true? (Choose two.)

- A.** LDP session can be applied onto to a directly connected neighbor.
- B.** LDP label bindings must be re-advertised when the directly connected link comes back.
- C.** MPLS LDP session protection uses LDP targeted hellos.
- D.** LDP session stays up as long as the LDP peer is reachable after a network failure.
- E.** MPLS LDP session protection and LDP IGP synchronization are mutually exclusive features.

**Answer: C,D**
