It will help you pass your 4A0-230 exam in shortest time, It contains the latest 4A0-230 questions and answers, Search for your connected exam and easily pass your Nokia exam with all the 4A0-230 dumps.

NEW QUESTION: 1

An existing cube dimension that has 30 attribute hierarchies is performing very poorly. You have the following requirements:

- * Implement drill-down browsing.
- * Reduce the number of attribute hierarchies but ensure that the information contained within them is available to users on demand.
- * Optimize performance.

You need to redesign the cube dimension to meet the requirements.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A.** Create user-defined hierarchies. For the attributes sourced by the levels of the user-defined hierarchies, set the RelationshipType property to Rigid. Run incremental processing.
- B.** set the AggregateFunction property to Sum on all measures. Use the SCOPE statement in a Multidimensional Expressions (MDX) calculation to tune the aggregation types.
- C.** Set the AttributeHierarchyOptimizedState property to FullyOptimized on the attribute hierarchies.
- D.** Remove as many attribute hierarchies as possible from the dimension. Reintroduce the information in the attribute hierarchies as properties. Implement natural hierarchies and set the AttributeHierarchyVisible property to False for attributes used as levels in the natural hierarchies.

Answer: D

NEW QUESTION: 2

Examine the following scenario:

- Database is running in ARCHIVELOG mode.
- Complete consistent backup is taken every Sunday.
- On Tuesday the instance terminates abnormally because the disk on which control files are located gets corrupted

The disk having active online redo log files is also corrupted.

The hardware is repaired and the paths for online redo log files and control files are still valid. Which option would you use to perform the recovery of database till the point of failure?

- A.** Restore the latest backups control file, perform complete recovery, and open the database with the RESETLOGS option.
- B.** Restore the latest whole backup, perform incomplete recovery, and open the database with the RESETLOGS option.
- C.** Restore the latest whole backup, perform complete recovery, and open the database normally
- D.** Restore the latest backup control file, perform incomplete recovery using backup control file, and open the database with the RESETLOG option.

Answer: D

NEW QUESTION: 3

Active Directory is installed on a server named contoso.com. The server is a member of an Active Directory domain named contoso.com. The server is a member of an Active Directory domain named contoso.com.

Active

Directory is installed on a server named contoso.com. The server is a member of an Active Directory domain named contoso.com. The server is a member of an Active Directory domain named contoso.com.

Active Directory

is installed on a server named contoso.com. The server is a member of an Active Directory domain named contoso.com. The server is a member of an Active Directory domain named contoso.com.
