NEW QUESTION: 1

Ihr Unternehmen plant, mehrere Webserver und mehrere Datenbankserver für Azure bereitzustellen.

Sie müssen eine Azure-Lösung empfehlen, um die Verbindungstypen von den Webservern zu den Datenbankservern zu beschränken.

Was sollten Sie in die Empfehlung aufnehmen?

- A. network security groups (NSGs)
- B. a local network gateway
- C. Azure Service Bus
- D. a route filter

Answer: A

Explanation:

Explanation

A network security group works like a firewall. You can attach a network security group to a virtual network and/or individual subnets within the virtual network. You can also attach a network security group to a network interface assigned to a virtual machine. You can use multiple network security groups within a virtual network to restrict traffic between resources such as virtual machines and subnets.

You can filter network traffic to and from Azure resources in an Azure virtual network with a network security group. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources.
