Answer: C

NEW QUESTION: 4

An organization has setup multiple IAM users. The organization wants that each IAM user accesses the IAM console only within the organization and not from outside. How can it achieve this? Please select:

- A.** Create an IAM policy with the security group and use that security group for AWS console login
- B.** Create an IAM policy with a condition which denies access when the IP address range is not from the organization
- C.** Create an IAM policy with VPC and allow a secure gateway between the organization and AWS Console
- D.** Configure the EC2 instance security group which allows traffic only from the organization's IP range

Answer: B

Explanation:

Explanation

You can actually use a Deny condition which will not allow the person to log in from outside. The below example shows the Deny condition to ensure that any address specified in the source address is not allowed to access the resources in aws.

Option A is invalid because you don't mention the security group in the IAM policy Option C is invalid because security groups by default don't allow traffic Option D is invalid because the IAM policy does not have such an option For more information on IAM policy conditions, please visit the URL:

<http://docs.aws.amazon.com/IAM/latest/UserGuide/access-pol>

[examples.htm#iam-policy-example-ec2-two-condition!](#)

The correct answer is: Create an IAM policy with a condition which denies access when the IP address range is not from the

organization Submit your Feedback/Queries to our Experts
