Satisfy yourself before purchasing dumps.

NEW QUESTION: 1

Which three options are available when creating a security profile? (Choose three.)

- A. Threat Prevention
- B. Antivirus
- C. IDS/IPS
- D. Anti-malware
- E. File Blocking
- F. URL Filtering

Answer: B,D,E

Explanation:

Explanation/Reference:

Using the URL Category as match criteria allows you to customize security profiles (antivirus, anti-spyware/malware, vulnerability, file-blocking, Data Filtering, and DoS) on a per-URL-category basis.

NEW QUESTION: 2

You are the project manager of your organization. Your organization will receive a bonus if the project finishes by December 20. Management has communicated this bonus to you and your project team and has asked you to evaluate the project to see if it is possible to realize the reward. The bonus offered to your organization is \$750,000. You have examined the project and believe that you can crash the project for an additional \$275,000 and reach the December 20 date. Management is thrilled with your assessment and they approve the crash fee. What risk response is this?

- A. Crashing can be considered transference because of the \$275,000 is actually paid from the bonus, which is paid by the project customer.
- B. Crashing is the addition of labor, not a risk response.
- C. Crashing can be a type of the enhancing risk response.
- D. Crashing can be a type of the exploit risk response.

Answer: C

NEW QUESTION: 3

Cloud Managed Networking (CMN) is a cloud-based network management solution that allows you to manage your network from a central console. CMN provides a single point of control for your network, making it easier to manage and maintain. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.

CMN is designed to be used with Palo Alto Networks firewalls. It provides a central console for managing your firewalls, including configuration, monitoring, and reporting. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.

- A. CMN is a cloud-based network management solution that allows you to manage your network from a central console. CMN provides a single point of control for your network, making it easier to manage and maintain. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.
- B. CMN is a cloud-based network management solution that allows you to manage your network from a central console. CMN provides a single point of control for your network, making it easier to manage and maintain. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.
- C. CMN is a cloud-based network management solution that allows you to manage your network from a central console. CMN provides a single point of control for your network, making it easier to manage and maintain. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.
- D. CMN is a cloud-based network management solution that allows you to manage your network from a central console. CMN provides a single point of control for your network, making it easier to manage and maintain. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.
- E. CMN is a cloud-based network management solution that allows you to manage your network from a central console. CMN provides a single point of control for your network, making it easier to manage and maintain. CMN also provides a number of advanced features, such as automated configuration and monitoring, which can help you to improve your network performance and reduce your operational costs.

Answer: B,C,E

NEW QUESTION: 4

Ein Finanzinstitut hat kürzlich eine Software zur Bekämpfung der Geldwäsche gekauft. Die Software generiert routinemäßig mehr Warnungen, als das Personal zur Bekämpfung der Geldwäsche aufgrund des begrenzten Personals ordnungsgemäß analysieren kann. Diese Warnungen werden durch

Standardsoftwareregeln generiert. Welche der folgenden Optionen sollte die Person, die für die Einstellung der Parameter der Geldwäschebekämpfungssoftware verantwortlich ist, empfehlen?

A. Deaktivieren Sie die Software, bis mehr Mitarbeiter für die Verarbeitung von Warnungen geschult sind.

B. Passen Sie die Softwareparameter so an, dass die Anzahl der Warnungen allmählich abnimmt.

C. Stellen Sie sicher, dass die Alarmparameter auf dem Risiko basieren.

D. Setzen Sie die Softwareparameter zurück, um die Risikosensitivität zu verringern.

Answer: C
