Firstly, all series of our SAP Certified Technology Associate - SAP System Security and Authorizations exam **Valid C-SECAUTH-20**

NEW QUESTION: 2

Refer to the exhibit. An engineer is troubleshooting an outbound call and needs to see each step of the dial plan as it is being parsed in the system. The engineer is not able to see all of the steps in the trace output. How can this problem be resolved?

- A. Change the SSL TraceType Flag to 0x9000EC44.
- B. Change the SDL Trace Max File Size to a higher number because it is not large enough to display dial plan steps.
- C. Change the SSL Trace Flush Immediately to True.
- D. Change the Digit Analysis Complexity to TranslationAndAlternatePatternAnalysis.

Answer: A

Explanation:

Since SW-1 is configured native VLAN is VLAN10, so traffic coming out of VLAN-10 is untagged, & goes directly to SW-2 Native VLAN: VLAN100, due to VLAN mismatch.

NEW QUESTION: 3

Refer to the exhibit. An engineer is troubleshooting an outbound call and needs to see each step of the dial plan as it is being parsed in the system. The engineer is not able to see all of the steps in the trace output. How can this problem be resolved?

- A. Change the SSL TraceType Flag to 0x9000EC44.
- B. Change the SDL Trace Max File Size to a higher number because it is not large enough to display dial plan steps.
- C. Change the SSL Trace Flush Immediately to True.
- D. Change the Digit Analysis Complexity to TranslationAndAlternatePatternAnalysis.

Answer: D

NEW QUESTION: 4

A Developer is creating an Auto Scaling group whose instances need to publish a custom metric to Amazon CloudWatch. Which method would be the MOST secure way to authenticate a CloudWatch PUT request?

- A. Create an IAM user with PutMetricData permission, and modify the Auto Scaling launch configuration to inject the user credentials into the instance user data.
- B. Create an IAM role with PutMetricData permission and modify the Auto Scaling launching configuration to launch instances using that role.
- C. Create an IAM user with PutMetricData permission and put the user credentials in a private repository; have applications pull the credentials as needed.
- D. Modify the CloudWatch metric policies to allow the PutMetricData permission to instances from the Auto Scaling group.

Answer: B
